Collections on FansyMe

Collections are a way to group **multiple free posts** into one curated list.

They are designed to help organise content, improve discovery, and allow the community to highlight posts around a certain theme or topic. Collections are **not paid content** and are **not meant to replace subscriptions or PPV**.

Both fans and creators can take part in Collections.

For Fans

What exactly is a Collection?

A Collection is a list of **free posts** that belong together in some way.
For example, a Collection could focus on a specific creator, style, outfit, theme, or moment.

Instead of scrolling through profiles, Collections help you find related content in one place.

What kind of posts can be added?

Only **free posts** can be added to Collections.

The following posts **cannot** be added:

- subscriber-only posts
- PPV (pay-per-view) posts

This rule applies to everyone and helps keep Collections accessible and fair.

Can I add posts to a Collection?

Yes.

- Fans can add **free posts** to Collections
- To prevent spam, there is a daily limit of **5 posts per day per user**

This limit applies to both fans and creators.

Can I create my own Collection?

Yes, fans can create Collections.

However:

- Every new Collection must be **reviewed and approved** by the FansyMe admin team before it becomes public

This ensures quality, relevance, and compliance with platform rules.

What happens when I create a Collection?

When creating a Collection, you choose how it should be handled:

Option 1: You are the moderator

- You can remove posts from the Collection
- You are responsible for keeping it clean and relevant

Option 2: You are not the moderator

- You submit the Collection without moderation rights
- If approved, **FansyMe takes over moderation**
- The Collection becomes community-managed under platform guidelines

After approval

Once approved:

- The Collection becomes visible on the platform
- Users can add free posts within the daily limits
- Moderation follows the option chosen during creation

For Creators

What are Collections from a creator’s perspective?

Collections are a way to organise and showcase **free content** in a structured way.

They help fans discover your content more easily and highlight themes without putting content behind a paywall.

Collections are meant to support discovery, not replace monetisation.

Which posts can be added?

Only **free posts** can be added to Collections.

You cannot add:

- subscriber-only posts
- PPV posts

This applies to creators and fans alike.

Can creators add posts to Collections?

Yes.

- Creators can add free posts to Collections
- There is a limit of **5 posts per day per user**

This keeps Collections balanced and prevents misuse.

Can creators create Collections?

Yes.

- Creators can create Collections
- All Collections require **admin approval** before becoming public

Approval helps ensure Collections stay useful, relevant, and compliant.

Moderation choices when creating a Collection

When creating a Collection, creators can choose:

Be the moderator

- You can remove posts from the Collection
- You actively curate the content

Do not be the moderator

- You submit the Collection without moderation rights
- If approved, FansyMe manages and moderates the Collection

Why use Collections as a creator?

Collections help you:

- organise free content clearly
- improve discoverability
- guide fans toward your profile
- participate in community-driven discovery

They work best as **supporting tools** alongside subscriptions and PPV.
