How to post content?

Creator Questions · https://help.fansyme.com/docs/creator/how-to-post-content/

This post is also available in: Deutsch (German)

On FansyMe, you have complete control over how you share your content with your fans. Whether you want to attract new followers, reward your loyal subscribers, or offer exclusive items for purchase, FansyMe gives you the tools to do it your way. Your creativity and preferences decide how you interact with your audience, ensuring your content is shared in the way that works best for you.

Here’s how you can offer content on your feed:

1. **Free/Public Content**: Attract new fans with posts that are visible to everyone. These posts are also featured on the Discover page, giving you a chance to expand your reach and connect with a wider audience.
2. **Subscriber-Only Content**: Reward your most dedicated fans with exclusive content that’s available only to your subscribers. Want to reach beyond your subscriber base? You can also allow non-subscribers to unlock these posts with a one-time payment.
3. **PPV (Pay-Per-View)**: Offer unique, exclusive content at a fixed price. Customize your offers by providing discounts to your subscribers, giving them even more reasons to stay connected and

engaged with your work.

No matter how you choose to post, FansyMe empowers you to monetize your content while building meaningful relationships with your fans.
