Two-Factor-Authentication

Security · https://help.fansyme.com/docs/security/two-factor-authentication/

This post is also available in: Deutsch (German)

Enable two-step verification on your FansyMe account for added security. Log in to your account, go to "Settings > Privacy & Security" and toggle on "Two-step verification." Follow prompts to link your Authenticator app. Use the 6-digit code from the app to log in. Two-step verification is always encouraged and required for certain actions on FansyMe, such as changing banking details or after periods of inactivity.

Download Google Authenticator or Microsoft Authenticator from your app store.

Google Authenticator:

- iOS
- Android

Microsoft Authenticator:

- iOS
- Android
